SUMMARY

Full Stack Web Developer with 2+ years of experience building and shipping production MERN stack applications, including real-time systems, finance platforms, and enterprise building-management software. Proven track record of improving application performance, reducing technical debt, and delivering features on time in remote and cross-functional team environments.

EXPERIENCE

Full Stack Developer

02/2025 – Present

Enorus

Remote

- Developed and maintained full-stack real estate web applications using React.js and Node.js, achieving 98% test coverage.
- Delivered Version 1.0 on schedule with a clean, modular architecture, reducing technical debt by 30%.
- Improved API response time by 40% and maintained 99.9% application uptime through performance optimization and monitoring.

Full Stack Developer

05/2024 – 02/2025

IVY Interactive Solution

Islamabad

- Engineered a real-time chat application using WebRTC and Node.js, improving user engagement by 45%.
- Boosted mobile responsiveness by 30%, reducing bounce rate across devices.
- Enhanced application reliability through unit and integration testing, cutting production bugs by 40%.

Full Stack Developer - Part Time

04/2024 – 08/2024

Darken Tech

Remote

- Engineered a stock management system with real-time tracking using the MERN stack, reducing inventory discrepancies by 40%.
- Helped deploy 4 major features across the product, contributing to a 95% client satisfaction rate.
- Reduced production errors by 50% through code reviews, refactoring, and adoption of clean-code practices.

MERN Stack Developer

10/2023 – 05/2024

The Cloud Services

Islamabad

- Built a Building Management System (BMS) using MongoDB, Express, React, and Node.js, reducing manual workflows by 40%.
- Improved application performance, cutting downtime by 50% and speeding up page load times by 30%.
- Secured the application with JWT authentication and role-based access control (RBAC) across 4 distinct user roles, reducing unauthorized access incidents to zero post-launch.

Code Reviewer - Part Time

02/2023 – 03/2024

Microverse

Remote

- Reviewed 300+ full-stack applications (JavaScript, Ruby on Rails), improving code clarity and architecture for global developers.
- Guided developers in resolving code issues, lowering resubmission rates by 40%.
- Promoted Git workflow standards and clean code practices, driving 30% higher adoption among students.

BS – ComputerScience

Federal Urdu University

2022

Islamabad, Pakistan

Final Year Project: Degree Tracking and Validation System (MERN Stack).

 PROJECT**Spend Wise - Expense Tracker**

- Built a personal finance tracker (MERN stack) with authentication, interactive charts, and CSV export.
- Optimized backend queries to deliver under 150ms response time for expense filtering.
- Improved budgeting accuracy by 30% and visual data clarity by 45% through custom dashboard design.

Degree Tracking and Validation System

- Built a digital degree-verification system (MERN stack) that cut student visits by 70% and paperwork by 60%.
- Implemented secure logins and admin dashboards, increasing process transparency by 50%.
- Enabled real-time application status updates, achieving 40% faster processing time.

Food Donation Finder

- Matched donors with NGOs using geolocation-based matching, improving food pickup rates by 55%.
- Decreased food spoilage by 40% through real-time alert notifications.
- Provided MVP 30% ahead of schedule, raising donor signups by 25%.
